Part 1 — Inventory Gap: High Stock, Low Ad Support

ASINs with significant on-hand inventory receiving little or no Sponsored Products spend. Immediate sell-through risk.

Strategic
Recommen-
dations

- 1

Ø=P̂ Activate aged inventory NOW

B00DBAAJQ6 (1,488 units, 711 aged 90+) and B07SKX78PV (1,655 units, 455 aged) have ZERO ad support. Long-term storage fees imminent. Recommend \$2,000–3,000/mo SP campaigns on each immediately.
- 2

&î Scale the starved high-ROAS winners

B000XJJN60 (86x), B0039YX77M (34x), B0B354X985 (33x), B00HDODQYS (30x) are generating exceptional returns on micro budgets (\$60–350/mo). Shift \$10k–15k/mo from lower-ROAS campaigns here — potential \$150k+ in incremental attributed sales.
- 3

Ø=Ý Audit B00DBAA696 and B0BCMLLSHL keyword quality

These two ASINs consume \$64k/mo (48% of SP budget) at 5.4x and 6.6x ROAS. Solid but below portfolio average. Keyword harvest and negative keyword pruning could improve efficiency by 1–2x without cutting budget.
- 4

Ø=Üæ B000QZ3UG0 — 952 units, zero direct ad support

Appears in campaign names but shows \$0 in advertised product report. Possible targeting gap — campaigns may be spending to land on competitors ASINs instead. Audit ad group ASIN targets and add as exact match advertised product.
- 5

Ø<ß Coordinate DSP retargeting with inventory push

DSP is running at 8.3x ROAS (~\$112k MTD). Add retargeting segments for high-inventory ASINs to DSP audience pools — people who viewed but didn't buy are cheapest to convert and accelerates sell-through without new SP campaigns.
